

## **Chapter Two: Section II - Additional Site Visits**

In addition to the fifteen site visits that formed the core of the project, and that were identified through the project methodology, members of the team were involved in other site visits that are of interest, and to which reference may have been made in the main report. These visits have occurred before and after the project, and additional reports may be added if other relevant visits are made.

The first of these reports is based upon a visit to the Technical University at Eindhoven in the Netherlands, made by John Lidgey and George Roberts from Oxford Brookes University. Having been made prior to the commencement of the project this report does not follow the standard template used by the project team.

The second report is based upon a visit by Bob Hunter and Stephen Clarke from the University of Birmingham.
